ETHICS, COMPETENCE, EXCELLENCE

**“OUR REPUTATION IS
EVERYTHING AND OUR
CUSTOMERS ARE OUR
FUTURE”**

Integrity

We believe integrity is all about doing the right thing. With every transaction and human interaction, integrity remains our highest standard expectation. Every day we demonstrate our sincere commitment to employees, customers and protecting our good name.

Respect

We believe every employee at every level deserves a positive and productive work environment, with recognition of their contributions.

Commitment

We believe that any successful business is built on commitment, so we honor the commitments we make to our employees, clients and the companies we team with. We also take responsibility for our actions and focus on timely delivery, fairness and co-operation.

Caring

We believe people are at the very heart of our business success. Showing empathy and respect to everyone builds trust and mutual understanding.

CONSULTING SERVICES

IT Strategy and Planning

Helping clients navigate through strategic planning to create change and achieve corporate alignment.

Our Value Based Management Methodology allows us to help clients align their decisions to business needs.

IT Performance and Governance

Modern governance models provide a bridge for stronger relationships with IT and the client ensuring alignment with IT operational priorities.

Our IT Service Management (ITIL) and Business Intelligence expertise make us an ideal partner in this area.

BPO/IT Process Improvement

Making your organization more competitive by driving down costs and increasing performance.

Our team will draw on real-world experience and deep industry best practice knowledge to help you achieve a more effective and efficient IT organization.

IT Security and Compliance

Reducing IT related risk, securing your critical information assets, and ensuring regulatory compliance through the application of industry-leading security practices.

Domain expertise across multiple industries helps us to fully assess risk and ensure compliance.

CONSULTING SERVICES

Development and Maintenance

Aspire designs and develops custom software for enterprise-wide and mission-critical solutions. We support current programs with top developers in all technologies.

Aspire applies Agile/Scrum SDLC best practices in its structured development approach, from an initial feasibility assessment through the design, testing, deployment and maintenance life cycle phases.

Independent Verification and Validation (IV&V)

Aspire's QA team has vast experience making sure software systems meet specification and performance requirements. We use Developmental, QA, Testing and User Acceptance best practices along with Independent Verification and Validation (IV&V) within a test environment which mirrors the client's exact production environment.

Provides the client an unbiased approach to testing and certifies that the application does what it is intended to do.

Information Management

Aspire conducts Business and Technology Assessments in Enterprise Content Management (ECM), Data Integration, Data Security, Data Quality, Information Architecture, Information Delivery, Business Intelligence (BI) and Information Governance.

Creation and execution of an Information Strategy that provides more timely, accurate, and comprehensive information for business decision making.

PROFESSIONAL SERVICES

IT Service Management

Design, configuration, and installation of the leading Business Service Management tools to meet the needs of our client's environment.

Experienced consultants who understand both the technical nature of your applications as well as the real-world usability needs of your business.

Infrastructure & Development

Design and implementation of virtualized infrastructure solutions that optimize distribution and availability of IT services.

This end-to-end service provides critical details for planning and design as well as best practices implementation.

Human Capital Solutions

Aspire supports on-site/on-site IT with resources across the entire SDLC spectrum. We target Cloud, Big Data/Analytics, Mobile and Security.

Aspire provides "Best Of Breed" Technical and IT Experts to deliver cost cutting solutions.
